Professional Summary

Frontend Developer with **4+ years** of experience building and scaling high-performance web applications using **React, Next.js, and TypeScript**. Proven success in optimizing UI/UX workflows, improving application speed by up to **30%**, and enhancing system reliability by **35%**. Adept at full-stack architecture (PostgreSQL, Django, Docker) and specialized skills like **real-time communication (Socket.IO)** and **RAG/AI pipelines**. Combines deep technical execution with recognized strength in creating high-impact developer documentation.

Core Technical Competencies

Category	Skills
Frontend/UI	React.js, Next.js, TypeScript, Redux, Recoil, Tailwind CSS, SASS/LESS, Figma, Three.js
Languages	JavaScript (ES6+), Python, Typescript, HTML5, CSS3, SQL
Backend/DB	Django, Express.js, PostgreSQL, Supabase, Redis, REST APIs
DevOps/Tools	Git, Docker, NGINX, Vercel, CI/CD, Webpack
Specialized	RAG/AI Pipelines (LangChain/LangGraph), Socket.IO, WebRTC, Graph Database Concepts

Selected Full-Stack & Frontend Projects

AkinSphere Global Job Board Platform (Solo Project)

Stack: Python/Django, React 18, Tailwind CSS, PostgreSQL, Docker, Redis, Rasa AI

- Full-Stack Development:** Architected and launched a global job marketplace from scratch, scaling to **3,100+ registered candidates** and **210 active company accounts** within 7 weeks.
- Frontend Performance:** Built a **mobile-first React + Tailwind frontend** achieving **96+ Lighthouse Performance** scores.
- System Design:** Achieved **99.9% uptime** and sub-1.8s average page loads using **Docker**, **NGINX**, and Redis caching.

- **Advanced Features:** Integrated **Rasa open-source conversational AI** for natural-language queries, achieving **92% intent recognition accuracy**.

AkinSpace: Realtime Collaboration & Research Workflow Platform

Stack: **TypeScript, Supabase, Socket.IO, Express.js, PostgreSQL, Vercel**

- **Real-time Architecture:** Designed and implemented a **socket-powered collaboration suite** featuring real-time messaging (**Socket.IO**) and embedded video conferencing (**WebRTC via Jitsi**).
- **Security & Access:** Integrated **Supabase** for robust authentication and secure, role-based access control.

Academic RAG Platform (University Academic Chatbot)

Stack: **React, TypeScript, Flask, LangGraph, Llama 3.1, SQL**

- **Integration:** Developed the **React/TypeScript** chatbot interface, integrating seamlessly with a Flask backend hosting the **LangGraph-powered RAG pipeline**.
 - **Deployment:** Implemented a robust Linux deployment strategy using **HAProxy, NGINX**, and **Gunicorn** for high availability.
-

Professional Experience

1st Edge LLC – United States (Remote)

Frontend Web Developer & Software Engineer | Apr 2021 – Feb 2025

- Engineered and deployed **15+ performant, full-stack and frontend web applications**, resulting in a **35% increase** in overall system reliability and stability.
- Collaborated cross-functionally to optimize complex **UI/UX workflows** using **React, TypeScript**, and integrating automated testing pipelines.
- Integrated **RESTful APIs** and developed automation pipelines, contributing to a **20% reduction** in manual Quality Assurance (QA) hours.
- Authored high-quality technical documentation and code guides, accelerating new engineer onboarding by **28%**.

Scout LLC – Remote

Senior Frontend Engineer | Feb 2022 – Jul 2023

- **Architected and optimized** data-rich internal dashboards using **React.js and TypeScript**, achieving a **30% improvement** in application load times and rendering performance.
- Implemented fully responsive interfaces and established testing automation frameworks to maintain code quality.

GitLab – Remote (Contract)

Technical Writer Mar 2024 – Nov 2024

- Created developer documentation, API references, and tutorials for GitLab's DevSecOps platform.
- Improved content accessibility and reduced internal documentation queries by 18% through structured Docs-as-Code workflows.

Hexagon Asset Lifecycle Intelligence – LATAM (Remote)

React Web Developer & UI/UX Designer | Aug 2020 – Dec 2021

- Built responsive enterprise interfaces for SaaS applications with **React and Figma**.
- Delivered optimized design systems that enhanced product usability scores by **25%**.

Galvanize Inc – United States

Software Engineering Bootcamp Instructor & Technical Trainer | Dec 2022 – Oct 2023

- Delivered AI and web development courses to 150+ students.
- Increased learner outcomes by **40%** through hands-on, project-based instruction.

Key Achievements

- **Documentation & Training:** Developed curriculum and documentation systems used by **1,000+ learners** globally.
- **Technical Communication:** Recognized for producing high-impact frontend documentation and training materials for global software platforms.

Education

- **B.Tech Industrial & Production Engineering** – University of Ibadan
 - **B.A. English Language (First Class Honors)** – Babcock University
-
